Professional Profile

A highly technical and versatile engineer with a unique blend of expertise in high-level software development and low-level hardware experimentation. As a Co-Founder and Lead Technical Mentor, I have demonstrated excellence in building both complex technical ecosystems and high-performing engineering talent.

Areas of Expertise

- Distributed Systems: Python/Flask and containerized microservices.
- RF & Wireless Security: SDR, BLE, and sub-GHz protocols.
- API Engineering: Scalable RESTful frameworks with JWT and Redis.
- Technical Leadership: Founding startups and curriculum design.

Professional Experience

ASENASS Developers | Co-Founder (2024 - Present)

- Co-engineered 5+ commercial applications with 99.9% uptime.
- Architected core infrastructure using Docker and GitHub Actions.
- Optimized API performance by 35%.

ASENASS Academy | Lead Technical Mentor (2024 - Present)

- Developed SE curriculum increasing engagement by 40%.
- Mentored 50+ engineers in industrial backend and devops.

Technical Projects (In-Depth)

ASENASS LMS: Flask/React/WebSockets platform for 500+ concurrent learners.

RF-SDR Framework: End-to-end signal monitoring and FFT processing.

BLE Security System: ESP32/C++ system for protocol vulnerability analysis.

Education

Moringa School: Professional Certificate in Software Engineering (2024)
