Professional Summary

Innovative Engineer and Technical Founder operating at the intersection of high-level software architecture and low-level hardware exploration. Co-founder of ASENASS Developers, specialized in building scalable distributed systems and IoT solutions. Expert in Python/Flask and React, with a deep specialization in RF signal analysis and SDR-based security research.

Technical Skills

- Software: Python, Flask, React, SQL Alchemy, REST APIs, Docker, CI/CD, Redis, PostgreSQL.
- Hardware/RF: SDR, BLE Analysis, Embedded C++, Signal Processing, ESP32, MQTT.
- Leadership: Technical Planning, Community Building, Mentoring, Agile Management.

Experience

ASENASS Developers | Co-Founder (2024 - Present)

- Co-engineered 5+ commercial applications using Flask/React; achieved 99.9% uptime via Docker.
- Architected an LMS for 500+ students with real-time WebSocket-based coding challenges.
- Reduced API response times by 35% through Redis caching and DB optimization.
- Automated CI/CD pipelines via GitHub Actions, reducing release cycles by 40%.

ASENASS Academy | Lead Technical Mentor (2024 - Present)

- Designed SE curriculum resulting in 40% increase in student engagement.
- Mentored 10+ developers on clean code and professional toolsets.

Key Projects

RF-SDR Dashboard: Real-time frequency monitor using Flask/React and pyrtlsdr; rendered low-latency waterfall plots via D3.js.

BLE Security Research: Developed ESP32 firmware in C++ for signal interference and protocol analysis.

Education

- Moringa School: Professional Certificate in Software Engineering (2024)
