Professional Summary

Bold Engineer and Hacker operating at the intersection of software elegance and hardware curiosity. Co-founder of ASENASS Developers with a proven track record of building scalable web applications, REST APIs, and custom learning platforms. Expert in Python/Flask and React, with a deep-seated passion for RF engineering and embedded systems.

Technical Skills

- Software Engineering: Python (3+ yrs), Flask, React, SQL Alchemy, REST APIs, JavaScript, WebSocket, Docker.
- Hardware & RF: RF Engineering, SDR Analysis, BLE Systems, Embedded C++, Signal Processing, Arduino/ESP32.
- Leadership: Technical Mentoring, Team Leadership, Project Management, Training Delivery, Open Source.

Experience

ASENASS Developers | Co-Founder (2024 - Present)

- Architected and built scalable web applications and REST APIs using Python/Flask and React.
- Developed a custom Learning Management System (LMS) serving 500+ students.
- Spearheaded deployment and infrastructure management.

ASENASS Academy | Technical Mentor (2024 - Present)

- Delivered training in Git, CI/CD, and modern software tooling.
- Mentored 10+ junior developers through project-based learning.

Education

- Moringa School: Professional Certificate in Software Engineering (2024)
